2023-2025

Master of Computer Application(MCA)
8.05 CGPA - Till-sem1

2020-2023

Bachelor of Computer Application (BCA)
Deen Dayal Upadhyay University
Gorakhpur
66%

2019-2020

HSC (12th), CBSE
Madhav public school

65%

2016-2017

SSC (10th), CBSE

85.50%

Madhav Public School

PROJECT

Automatic Attendance Recorder:

it's a face detection attendance recorder project where firstly we have to register a face via recognition on front of camera and then we take attendance. Attendance will automatically Mark present if face is matched with the registered face data.

Plant Disease Detector using CNN:

It is a computer vision project designed to identify and diagnose various plant diseases using a Convolutional Neural Network (CNN) model. The project leverages deep learning techniques to accurately classify healthy and diseased plant leaves, helping farmers and agricultural experts detect diseases at an early stage and take preventive measures. By automating the disease detection process, this system aims to minimize crop loss and improve agricultural productivity

Invoice Management System:

Our Parchi app is designed for any web based device which supports an active internet browser. It will help any individual and will convert the invoice generation digitally. The User can view and keep track of added invoices and can also edit them. First step is to add customers and clients, along with products. For generating invoice we need to also update the product quantity. The project will provide vendors the required accurate user invoices for GST and tax clearance. It is a invoice management project

Certificate: Web Development , AWS virtual internship , Intern in Prodigy Infotech in webtech (3 months)

KEY SKILLS

- Problem solving and critical thinking
- A good team Player
- Attention to detail and accuracy
- Adaptability and Flexibility

HOBBIES

- Listening Music
- Games
